Professional Placement Services Customer Projects

Mylar Conversions (Mylar) – We provide precise stable-base material drawing digitization services for the Air Force (AF) Aperture Card Repository at numerous AF bases. The undimensioned drawings used by the AF were held to a strict measurement tolerance of plus or minus five-thousandths of an inch.

Uni-Comm PMO (Uni-Comm) – Assist Air Force Space Command in transforming their IT Service Management from a Base-Centric Environment to an Enterprise-Centric Environment. Developed, implemented, and Maintained Enterprise Business Processes, ITIL-based Business and Technical Service Catalogs, SLAs and Strategic Communications/Engagement Plans

Managed and provided most of the deployment resources for communications networking both the (DNS) Domain Name Server Program and the (CBI) Circuit Bundling Initiative program for Lucent Technologies.

Managed the Russian Railway Project

Supported the 1) Client On-Boarding Project web-based status report for networking outsourcing, 2) Migration Planning/Scheduling of GCSC from New Jersey to North Carolina, 3) Standardization of Project Planning/Scheduling, 4) Scheduling and Reporting of new customer network additions to GCSC, and 5) Systems Administration of Unix Servers for GCSC. Other programs we have had involvement in include Intrusion Detection System (IDS), and Common User Interface Network Transport (CUITN).

Supported the IUSS Wet and Dry programs for General Dynamics.
Implemented Fiber Optical Telecom Infrastructure Upgrade for Royal Saudi Government
Implemented Fiber Optical Telecom Infrastructure Upgrade for U.S. Army
Supported Help Desk Services for Global Telecom Network
Supported Nationwide Telemedicine Services Development Program
